Lubricants & Specialties

For that extra feeling of confidence on longer trips: pack a top-up bottle of Mobil 1 0W-40.

A driver's delight: Mobil 1 makes a fast start possible even under extreme conditions.

## Corvette: an American sports car icon packing a high performance engine

In the USA Corvette has been the unchallenged no. 1 sports car for over 50 years. Now in its sixth generation, the company has not wavered an inch from its philosophy of uncompromising sports design twinned with high-powered performance. An impressive engine beats at the heart of every Corvette – and to keep this thoroughbred machine running sweetly, Corvette recommends Mobil 1 0W-40 high-tech engine oil.

### Mobil 1: race-proven – optimal choice on the road

The Mobil 1 brand stands for lubricant performance, quality and technological progress worldwide. Over 100 years of lubricant expertise and ongoing innovation provide the firm foundations of these outstanding engine oils' success. Mobil 1's comprehensive lubricants know-how make continuous peak performance possible in motor racing – and are a major factor in Corvette Racing Cars' repeated success in championships the world over.

## Right from the starting grid: only the best for your engine

For Corvette, high-performance Mobil 1 0W-40 synthetic engine oil is the natural first choice – because modern engine technology demands a high-tech engine oil that also fulfils the requirements of longer service intervals. Choosing a Corvette means choosing a uniquely satisfying driving experience, even under extreme conditions.

And Mobil 1 0W-40 will be there to provide reliable engine protection, long after conventional oils have reached their limits.

### Outstanding protection – Mobil 1 0W-40

Mobil 1 0W-40 engine oil is engineered around particularly pure, high-grade base stock: together with SuperSyn Antiwear technology this aims to provide optimal protection against wear. Mobil 1 0W-40 helps prevent engine deposits and sludge build-up and aims to ensure long-term internal engine cleanliness and efficiency.

Mobil 1 0W-40's outstanding stability at extremes of temperature and excellent cold-start performance are key factors in ensuring the engine of your Corvette enjoys a long sporting life.

## Your benefits at a glance

- Optimized wear protection for long engine life
- Excellent cleanliness and deposit control
- Quick starting at low temperatures
- Outstanding catalyst efficiency
- Helps improve fuel economy
- Aims to reduce engine emissions to help protect the environment

### Mobil 1 meets or exceeds the following industry specifications:

	Mobil 1 0W-40
ACEA	A3/B3, A3/B4
API	SJ/SL/SM/CF
Approved by	GM-LL-A-025/GM-LL-B-025
